4. Glossary of environmental justice terminology Justice Terms

Environmental Justice

EPA: The fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income, with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies. This goal will be achieved when everyone enjoys: the same degree of protection from environmental and health hazards, and equal access to the decision-making process to have a healthy environment in which to live, learn, and work.

White House: For the Biden-Harris Administration, environmental justice is a whole-of-government commitment that requires early, meaningful, and sustained partnership with communities and dedicated leadership in Federal agencies.

Climate Justice

EPA: A movement, building on more than 20 years of commitment to Environmental Justice, to protect disadvantaged communities disproportionately affected by climate change.

White House: To help identify disadvantaged communities to ensure that 40 percent of the overall benefits of Federal climate, clean energy, and other key programs are reaching disadvantaged communities, as identified by the Climate and Economic Justice Screening Tool.

Economic Justice

EPA: *

White House: President Biden is renewing the federal government's commitment to making the American Dream real for families across the nation by taking bold and ambitious steps to build a more equitable economy. To meet this mandate, agencies are advancing equity for workers and jobseekers who face barriers and discrimination, strengthening social safety net programs that provide economic security, and supporting wealth building by growing opportunities for businesses in underserved communities.

Racial Justice

EPA: **

White House: It is therefore the policy of the Biden Administration that the Federal Government should pursue a comprehensive approach to advancing equity for all, including people of color and others who have been historically underserved, marginalized, and adversely affected by persistent poverty and inequality.

**The research was supported in part by NASA EPSCOR and Louisiana Board of Regents Support Fund

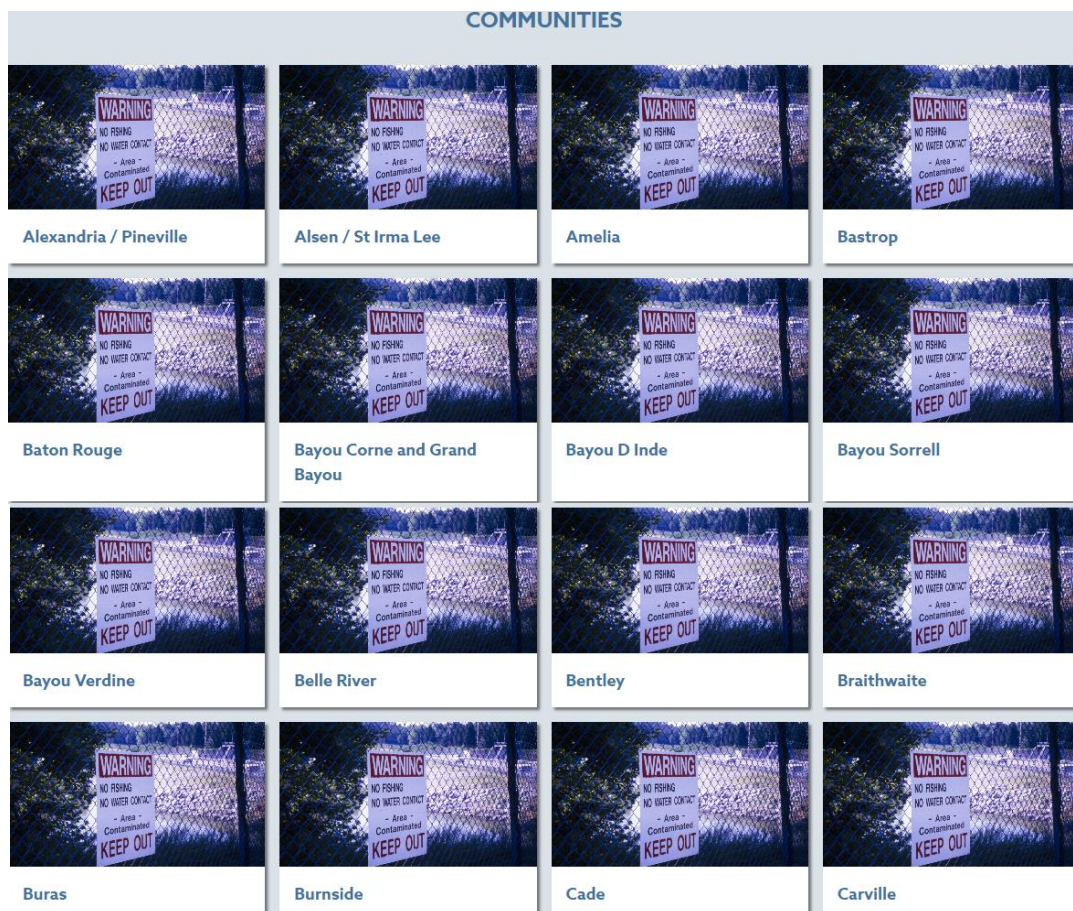

**The EPA lists no explicit definition for economic justice, but it is somewhat discussed in their definition for Environmental Justice. See EPA: Environmental Justice.*

***The EPA lists no explicit definition for racial justice. See EPA: Environmental Justice, where it is somewhat mentioned.*

****The research was supported in part by NASA EPSCOR and Louisiana Board of Regents Support Fund**

5. Map (link) to LEAN project map of EJ communities in LA

Louisiana Environmental Action Network (LEAN) is a community based not-for-profit organization to resolve the unique environmental issues in Louisiana through education, empowerment, advocacy, and support. LEAN is an excellent Open Science source that provides the necessary tools and services to individuals and communities facing environmental problems. The highlight project called “Community Atlas” aims to explore Louisiana's current and past environmental challenges. ON this website, there are collections of news articles, videos, photographs, oral histories, public comments, legal actions, and other media. The Louisiana's history represents the struggles of the environmental justice movement in Louisiana and United States.

TERRELL AND JAMES

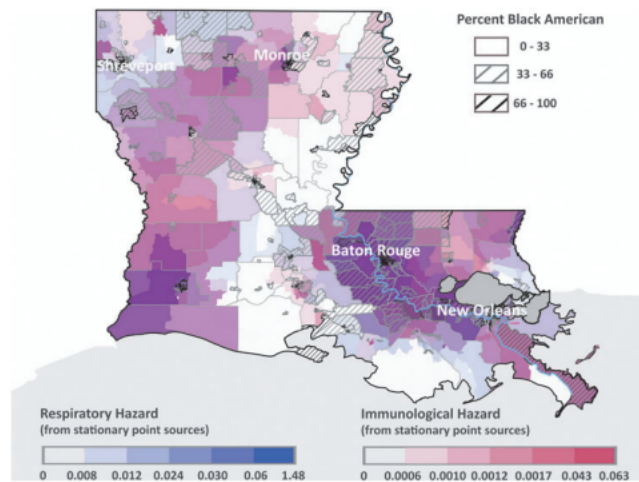

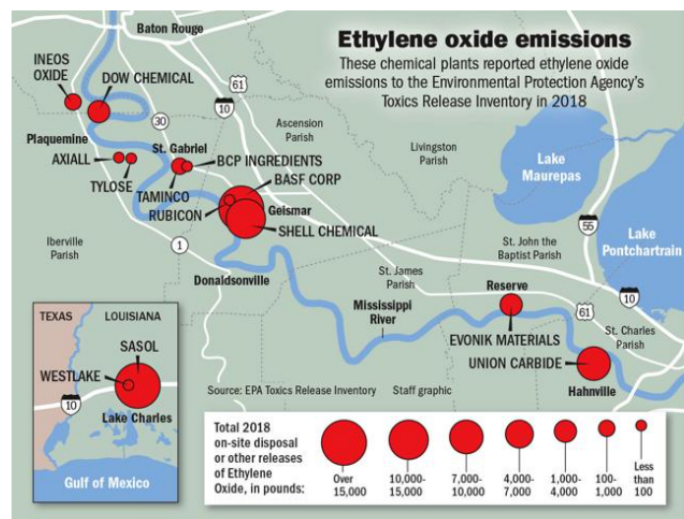

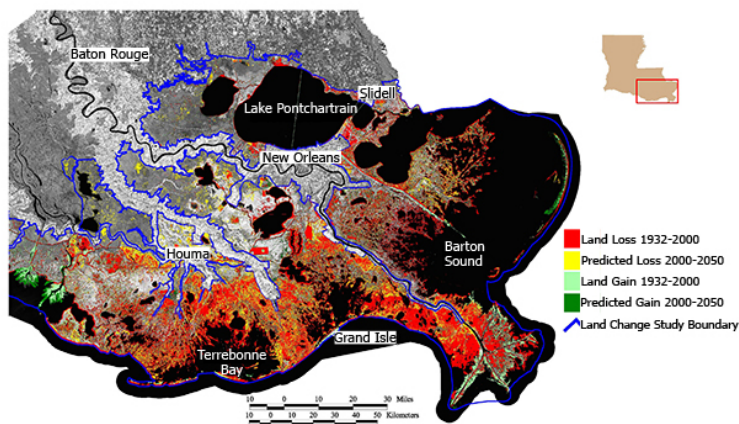

FIG. 1. RH, IH, and percentage of Black American residents by census tract. Hazards are from the most recent (2014) National Air Toxics Assessment and reflect stationary point sources of pollution only (i.e., excluding vehicles and other mobile or nonpoint sources). Hazards are broken down by quantile. IH, immunological hazard; RH, respiratory hazard.

15. Recognized Indigenous Tribes of Louisiana

The state-recognized tribes of Louisiana, The

Addai Caddo Tribe

the Biloxi-Chitimacha Confederation of Muskogee

The Choctaw-Apache Community of Ebarb

The Clifton Choctaw,

The Four Winds Tribe Louisiana Cherokee

Confederacy The Grand Caillou/Dulac Band

The Isle de Jean Charles Band

The Louisiana Choctaw Tribe

The Pointe-Au-Chien Indian Tribe

The United Houma Nation.

The Federally recognized

The Chitimacha Tribe of Louisiana

The Coushatta Tribe of Louisiana

The Jena Band of Choctaw Indians The Tunica-Biloxi Indian Tribe

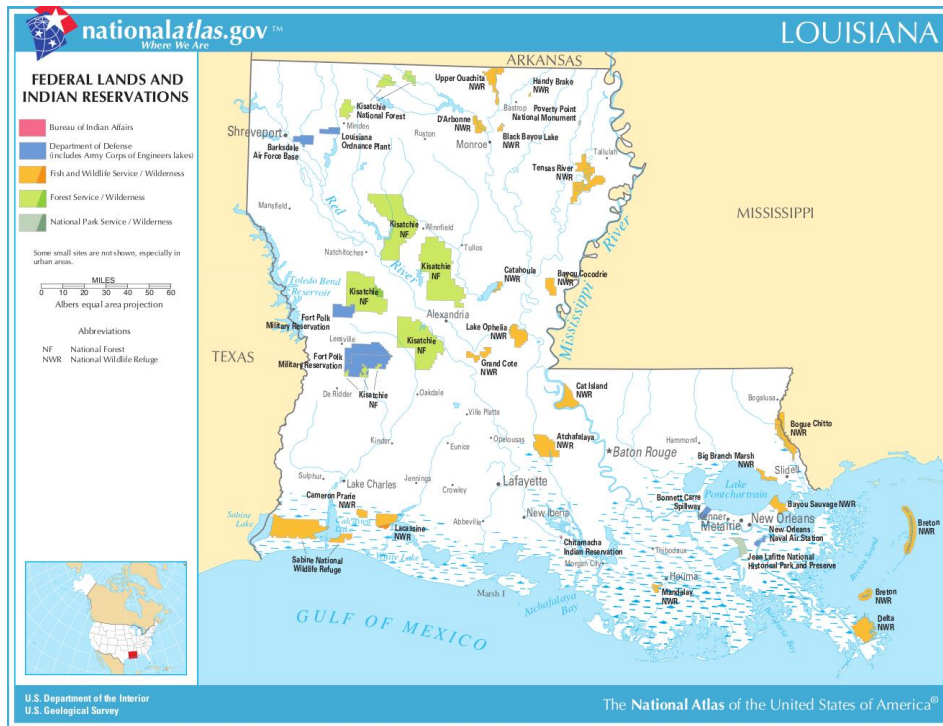

Note:

- The Coushatta Tribe of Louisiana, Jena Band of Choctaw Indians, and Tunica-Biloxi Indian Tribe of Louisiana are headquartered in the towns of Elton, Jena, and Marksville, respectively
- In New Orleans, approximately 2700 people identify as having American Indian/Alaska Native background, comprising 0.7% of the city's population. About 1.3% of Louisiana.
- New Orleans sits on the originally were the Chitimacha, with the Atakapa, Caddo, Choctaw, Houma, Natchez, and Tunica inhabiting throughout the state.
- The Chitimacha Tribe of Louisiana is the only Louisiana tribe to still live on a section of their original homeland, with a reservation located near the town of Charenton.
